

Nengine

A static node http server

Getting started

Install

```
$ npm install nengine
```

Note: nengine require nengine-cli

Introduction

if you have installed nengine-cli and nengine , you can run nengine by command:

```
$ nengine
```

and use:

```
$ nengine -h
```

for help.

you can config server by nengine.json under server root:

```
{
  "port": 80,
  "directory": "allow",
  "dotFiles": "deny",
  "maxAge": 2592000,
  "index": ["index.html"],
  "extensions": ["html"],
  "etag": true,
  "lastModified": true,
  "status": {
    "404": "/error/404.html",
    "default": "/error/default.html"
  }
}
```
